1.0 EXECUTIVE SUMMARY

Stantec Consulting, Inc. (Stantec) performed a Phase I Environmental Site Assessment (Phase I ESA) of Barrett Solar Update located at Farm to Market Road 2737 Point, Rains County, Texas (Subject Property). The purpose of the Phase I ESA is to identify recognized environmental conditions (RECs) in accordance with ASTM Standard E1527-21.

The Phase I ESA was conducted in conformance with the requirements of ASTM Designation E1527-21, and All Appropriate Inquiries (AAI) as defined by the United States Environmental Protection Agency (EPA) in Title 40 of the Code of Federal Regulations, Part 312 (40 CFR 312), except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in **Section 2**.

1.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property consists of approximately 911.14 acres of agricultural land located approximately 0.75 miles northwest of the city of Point in Rains County, Texas. According to the Rains County Appraisal District (RCAD), the property IDs and legal descriptions of the parcels that comprise the Subject Property are as follows:

Property ID	Legal Description	Acreage
33375	A0104 GARRETT JOHN H ACRES 66.2	66.20
4792	A0221 SHEFFIELD JOHN ACRES 213.3	213.30
33372	A0220 SCOTT JOHN W ACRES 97.58	97.58
33373	A0222 SHEFFIELD JOHN ACRES 264.92	264.92
4527	A0207 SMITH F L ACRES 40.0	40.00
4811	0228 TAYLOR A R SURVEY; 2 HOUSES BARNs, 521 ACRES	521.00
4818	A0228 TAYLOR A A ACRES 42.0	42.00
4817	A0228 TAYLOR A A ACRES 39.457	39.46
506	J BREWER SURVEY, ABST 13, 100 ACRES	100.00

1.2 DATA GAPS

The following data gaps were encountered during this assessment:

- A historical data gap was encountered during the review of the previous land uses. Topographic maps and aerial photographs were not available in five-year increments. However, the land use was determined to be primarily agricultural and a little change occurred between 1941 and present.
- The Point Volunteer Department was contacted regarding hazardous materials releases on the Subject Property. No response was received from the VFD as of the drafting of this report. Any response that affects the findings of this report will be forwarded to the User.

Based on the information obtained during the course of this ESA and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions. No other data gaps or deviations from the recommended scope of ASTM Standard E 1527-21 occurred as part of this Phase I ESA with the exception of any additions noted in the Scope of Work.

1.3 ENVIRONMENTAL REPORT SUMMARY

This study was performed in general accordance with the American Society of Testing and Material (ASTM) Standard Practice for Environmental Site Assessment, E 1527-21. The objective of the study was to identify RECs. The term "recognized environmental conditions" (RECs) is defined as: 1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. RECs are not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

The following RECs were identified in connection with the subject property:

- None

The following controlled RECs were identified in connection with the subject property:

- None

The following historical RECs were identified in connection with the subject property:

- None

The following *de minimis* conditions were identified in connection with the subject property:

- None

The following data gaps or failures were identified:

- A historical data gap was encountered during the review of the previous land uses. Topographic maps and aerial photographs were not available in five-year increments. However, the land use was determined to be primarily agricultural and little change occurred between 1941 and present.
- The Point Volunteer Department was contacted regarding hazardous materials releases on the Subject Property. No response was received from the VFD as of the drafting of this report. Any response that affects the findings of this report will be forwarded to the User.

Based on the information obtained during the course of this ESA and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions. No other data gaps or deviations from the recommended scope of ASTM Standard E 1527-21 occurred as part of this Phase I ESA with the exception of any additions noted in the Scope of Work.

Additional findings:

- Two old brick and mortar water wells or cisterns were observed on the southern portion of the Subject Property during the site reconnaissance (**Appendix A, Figure 2** and **Appendix B, Photo 12**). No hazardous materials concerns were observed to be associated with these structures.
- Minor dumping of barbed wire, concrete cinderblocks, plastic debris and scrap metal was observed on the Subject Property (**Appendix A, Figure 2**, and **Appendix B, Photos 01, 02, 07, 08, 09, and 11**). No hazardous materials were observed.

- A water treatment facility for the town of Point is located adjacent to the southeastern boundary of the Subject Property (**Appendix A, Figure 2, Appendix B, Photo 03, and Appendix D**). The database search returned Notices of Violation (NOVs) and Notices of Enforcement (NOEs) for this plant related to unauthorized discharges of sewage and failure to monitor effluent water quality. Any discharge from the plant flows into a ravine or creek east of the plant. This water flows south and west and does not enter the Subject Property. Sewage is not considered a hazardous material and releases at this site are not considered RECs or *de minimis*. There is no hazardous material threat to the Subject Property associated with this site.
- Oil and gas exploration activities have occurred at the subject property in the past. The oil and gas activities at the subject property have the potential to incur past releases, and it cannot be assumed that all releases have been documented. However, based on the review of current and available sources, this assessment did not indicate the presence or likely presence of a past or current hazardous material release, or conditions that may pose a material threat of a future release at the subject property. It should be noted that contamination of Total Petroleum Hydrocarbons (TPH), Benzene, Toluene, Ethylbenzene and Xylenes (BTEX), heavy metals, and/or Naturally Occurring Radioactive Materials (NORMs) are common in areas where oil and gas exploration has occurred including, but not limited to, well sites, tank battery sites, product transport sites, and reserve/waste pits. The concentration of contaminants may be minor, or potentially be present at levels that would require additional management or remedial action during construction or operation. If greater certainty regarding potential impacts and comparison to agency health screening levels or waste disposal criteria is desired, then sampling and testing can be conducted.

2.0 INTRODUCTION

Stantec performed a Phase I ESA of the subject property located at Farm to Market Road 2737, in Rains County, Texas. This Phase I ESA was conducted in accordance with our proposal to BT Barrett Solar, LLC. Solar dated January 22, 2023 and Client's authorization on January 22, 2023. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in **Section 2.4**, **Section 2.5**, and **Section 2.6**.

ASTM E1527-21 notes that the availability of record information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 PURPOSE

The purpose of this Phase I ESA is to investigate and identify recognized environmental conditions (RECs) and controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) associated with the Subject Property and surrounding properties.

ASTM Standard Practice E1527-21 defines RECs as: The presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs. *De minimis* conditions, are conditions related to a release that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ASTM Standard Practice E1527-21 defines CRECs as: A REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of controls.

ASTM Standard Practice E1527-21 defines HRECs as: A previous REC affecting the Subject Property that has been addressed to unrestricted use criteria established by a regulatory authority or authorities without subjecting the Subject Property to any controls (e.g., property use limitations or activity and use limitations).

2.2 SCOPE OF WORK

The Phase I ESA conducted at the Subject Property was in general accordance with ASTM Standard E 1527-21 and included the following:

- Site reconnaissance and visual survey of properties proximate to the Subject Property,
- Review of records regarding current and former operations at the Subject Property,
- A review of historical resources, such as property records, topographic maps, fire insurance maps, city directories, and aerial photographs,

- Review of previous environmental site assessments, if made available,
- Review of State and Federal environmental database information, and
- Evaluation of information and preparation of the report provided herein.

A Phase I ESA does not include sampling or testing air, soil, groundwater, surface water, or building materials. These activities would be carried out under separate cover, if necessary.

2.3 SIGNIFICANT ASSUMPTIONS

There is a possibility that even with the proper application of these methodologies, conditions may exist that could not be identified within the scope of the assessment, or which were not reasonably identifiable from the available information. Stantec believes that the information obtained from the record review and the interviews concerning the Subject Property is reliable. However, Stantec cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results but rather to provide BT Barrett Solar LLC with information relating to the Subject Property.

2.4 LIMITATIONS AND EXCEPTIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Subject Property.

This report provides an evaluation of selected environmental conditions associated with the Subject Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others. Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Subject Property's environmental condition.

The client did not contract Stantec to provide recorded title records or search results for environmental liens or activity and use limitations (AULs) encumbering the property or in connection with the Subject Property. The User did not report any environmental liens or activity and use restrictions associated with the Subject Property. Stantec did not obtain historical records that document the property history in 5-year intervals, (gaps in coverage from 1941 to 1949, 1949 to 1954, 1954 to 1966, 1966 to 1975, 1975 to 1985, 1985 to 1995, 1995 to 2003 were noted in the historic aerials; a gap in coverage from 1956 to 2016 was noted in the historic topographic maps; and no Fire Insurance Maps were available for the Subject Property). The inability to obtain historical records that document the property history in 5-year intervals is not considered a data gap as the property use could still be established from the records obtained and this did not impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in **Section 2.2**.

The conclusions are based on the conditions encountered at the Subject Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify Subject Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Subject Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Subject Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of Federal, state, provincial or local governmental agencies.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

2.5 DEVIATIONS

No deviations from the recommended scope of ASTM Standard E 1527-21 occurred as part of this Phase I ESA, except for any additions noted in the Scope of Work.

2.6 SPECIAL TERMS AND CONDITIONS

Authorization to perform this assessment and instructions regarding the Subject Property's location, access, and an explanation of the Subject Property and facilities to be assessed were provided by BT Barrett Solar LLC.

2.7 RELIANCE

This report has been prepared for the sole benefit of BT Barrett Solar LLC, the client. The report may not be relied upon by any other person or entity without the express written consent of BT Barrett Solar LLC and Stantec.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The Subject Property is located at Farm to Market Road 2737, Point, Texas. Information obtained from RCAD indicated that the property is 911.14 acres in size and the property IDs and legal descriptions of the parcels that comprise the Subject Property are as follows:

Property ID	Legal Description	Acreage
33375	A0104 GARRETT JOHN H ACRES 66.2	66.20
4792	A0221 SHEFFIELD JOHN ACRES 213.3	213.30
33372	A0220 SCOTT JOHN W ACRES 97.58	97.58
33373	A0222 SHEFFIELD JOHN ACRES 264.92	264.92
4527	A0207 SMITH F L ACRES 40.0	40.00
4811	0228 TAYLOR A R SURVEY; 2 HOUSES BARNS, 521 ACRES	521.00
4818	A0228 TAYLOR A A ACRES 42.0	42.00
4817	A0228 TAYLOR A A ACRES 39.457	39.46
506	J BREWER SURVEY, ABST 13, 100 ACRES	100.00

3.2 SUBJECT PROPERTY AND SURROUNDING AREA DESCRIPTION

The Subject Property is approximately 911.14 acres in size. The ground surface at the Subject Property slopes gently to the southeast. Ground cover consists primarily agricultural fields and wooded areas. Multiple stock ponds are present on the Subject Property. The Subject Property can be accessed from the west via an entrance from Farm to Market Road 2737 and from the south via County Road 1525. The Subject Property is used for cattle grazing and hay production. The area surrounding the Subject Property is primarily used for agriculture and light industry.

3.3 CURRENT USE OF SUBJECT PROPERTY

The Subject Property is used for agricultural purposes including cattle grazing and hay production. No residential, institutional, or commercial structures or uses were apparent. Two-track roads run through the northwestern portion of the Subject Property. Another two-track runs through the north central portion of the Subject Property. A pipeline easement runs northwest to southeast through the Subject Property.

3.4 DESCRIPTION OF STRUCTURES AND OTHER IMPROVEMENTS

There are no residences on the Subject Property. Two-track roads run through the subject property in the northwest and north-central portions. A pipeline easement runs northwest to southeast through the Subject Property. An old barn is present in the southern half of the Subject property near County Road 1525.

3.5 ADJOINING PROPERTY INFORMATION

During the site reconnaissance, Stantec observed the land use of adjoining properties. A summary of the observed uses is below.

Adjoining Property Information			
Direction From Subject Property	Occupant	Use	Comments
North	Multiple	Mixed Use	Rural and residential
South	Multiple	Agricultural	Agricultural fields and light residential use
East	Multiple	Mixed Use	Light industrial buildings, agriculture and residential use
West	Multiple	Mixed Use	Agricultural fields and light residential use

4.0 USER PROVIDED INFORMATION

As part of this Phase I ESA, Stantec requested information regarding the Subject Property from the "User," BT Barrett Solar LLC. User representative Stephanie Martin completed a User questionnaire on March 3, 2023. This section describes the information that the User provided.

4.1 ACTIVITY/USE LIMITATIONS

Stantec has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property located at Farm to Market Road 2737, Point, Texas 75472. Any exceptions to or deletions from this practice are described in **Section 2.5** of this report. Per ASTM Practice E 1527-21 it is the responsibility of the User to review title and judicial records for environmental liens and activity and use limitations (AULs) pertaining to the property. BT Barrett Solar LLC was provided a User Questionnaire to complete, which included questions on whether the User had 1) knowledge of the existence of environmental liens encumbering the Subject Property and 2) specialized knowledge and experience or actual knowledge that was material to RECs in connection to the Subject Property and adjoining properties. There was no indication of known environmental conditions on the Subject Property in the completed questionnaire. A copy of the User Questionnaire is included in **Appendix F**.

4.2 SPECIALIZED KNOWLEDGE

Stantec has no specialized knowledge of the Subject Property outside of the research conducted and discussed as part of this report. The User and all individuals interviewed as part of this investigation have not reported any specialized knowledge of the Subject Property outside of what is contained in this report.

4.3 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User reported that the purchase/lease price is a fair market value for the Subject Property and did not report any value reduction concerns that may indicate the presence of contamination.

4.4 OWNER, SUBJECT PROPERTY MANAGER, AND OCCUPANT INFORMATION

The User provided the property owner/manager and contact information to access the property. The reported owner was consistent with the owner listed in the CAD record.

4.5 REASON FOR PERFORMING PHASE I ESA

The purpose of this Phase I ESA was to identify existing or potential RECs (as defined by ASTM Standard E 1527-21) in connection with the Subject Property. Stantec understands that the findings of this study will be used to evaluate a pending financial transaction in connection with the Subject Property. This Phase I ESA is conducted as part of environmental due diligence before property transfer, lease, or refinancing.

5.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the Subject Property.

5.1 STANDARD ENVIRONMENTAL RECORD RESOURCES

Stantec contracted Environmental Risk information Services, Inc. (ERIS) to search Federal and State databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-21 are summarized in the following table. Detailed information for sites identified within the AMSDs is provided below, along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the Subject Property. The facilities listed in the ERIS database report do not represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site. No orphan sites (unplottables) identified on the ERIS database represent RECs or *de minimis* conditions at the time of the drafting of this report. A map showing the location of all sites listed in the Summary of Findings below is included in **Appendix A**. Copies of the ERIS research data and a description of the databases are included in **Appendix D** of this report.

Map Findings Summary								
Database	Target Property	Search Distance (Miles)	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted
CERCLIS	0	0.5	0	0	2	0	0	2
SEMS	0	0.5	0	0	1	0	0	1
SEMS ARCHIVE	0	0.5	0	0	1	0	0	1
CERCLIS NFRAP	0	0.5	0	0	1	0	0	1
ORD	0	0.25	0	6	0	0	0	6
NOV	0	0.25	0	1	0	0	0	1
NOE	0	0.25	0	1	0	0	0	1
PFAS IND	0	0.5	0	0	1	0	0	1

Detail Summary	
Site Name:	AAA Wire Products
Databases:	CERCLIS, CERCLIS NFRAP, SEMS ARCHIVE Unplottables: TRIS, RCRA TSD, RCRA CORRACTS, RCRA NON-GEN, IHW GENERATOR, HIST RCRA GEN
Address:	US Highway 69
Distance:	1664.24 feet
Direction:	East
Elevation:	513.7 feet
Comments:	This is a former metals manufacturing and finishing site that is regulated by the EPA. In the past, the site manufactured metal wire. Industrial waste generated included wastewater treatment sludges from electroplating operations. There is little documentation on the site but cleanup activities are currently inactive and the site is

Comments:	not on the NPL. The site is located downgradient from the Subject Property and is not expected to pose a hazardous material concern.
------------------	--

Site Name:	Extreme Metal Finishing
Databases:	CERCLIS, SEMS
Address:	501 Industrial Boulevard, Point, TX
Distance:	2016.62 feet
Direction:	East
Elevation:	510.06 feet
Comments:	This site is a former metals manufacturing and finishing facility and is regulated by the EPA. The facility declared bankruptcy in 2008 and RCRA activities are currently inactive. The site is not on the NPL. While it was operational, the site produced various industrial waste streams including chromium and cyanide-containing plating bath solutions. There is little information about the extent of contamination that is still present at the site. The site is located downgradient from the Subject Property and is unlikely to pose a hazardous material concern.

Site Name:	East/West Plant
Databases:	NOV, NOE, ORD
Address:	127 Locust Street, Point, TX 75472
Distance:	3883.39 feet
Direction:	East
Elevation:	523 feet
Comments:	The west plant is located adjacent to the subject property near the southeast corner. The east plant is mismapped on the database search and is actually located near 127 Locust Street, approximately 0.75 miles east of the Subject Property. The notices of violation and enforcement at the west plant site have to do with the treatment and disposal of sludge and sewage. Several releases of sewage into the environment failed to be reported to TCEQ. The east site is located far enough from the Subject Property that it is unlikely to pose a hazardous materials concern. Sewage releases, although a potential hazard to human health, do not qualify as hazardous materials. Thus, the west plant is not considered a REC.

5.2 ADDITIONAL ENVIRONMENTAL RECORD RESOURCES

Geographic Information Systems (GIS) data from the Railroad Commission of Texas (RRC) and the TCEQ Municipal Solid Waste Facilities Database were reviewed. No landfills were reported on the Subject Property. No additional environmental records sources were searched as part of this Phase I ESA. A natural gas pipeline was identified on the Physical Setting Report but was not mapped by the RRC. One dry hole is located in the northern portion of the Subject Property. No additional environmental records sources were searched as part of this Phase I ESA.

5.3 PHYSICAL SETTING

A Physical Setting Report was obtained from ERIS on May 10, 2023 (**Appendix D**). The following information was derived from that report and the field reconnaissance.

5.3.1 Topography

Based on a review of the 2019 USGS topographic map for the Subject Property area, the ground surface in the northern and central portions of the Subject Property slopes from the southwest and northeast to Cedar Creek which runs from the northwest to the southeast through the center of the Subject Property and in the southern portion of the Subject Property the ground surface slopes to the southeast toward Cedar Creek.

5.3.2 Surface Water Bodies

The nearest surface water in the vicinity of the Subject Property is Cedar Creek, located approximately in the center of the northern portion of the Subject Property and adjacent to the west of the southern portion of the Subject Property. Multiple stock ponds are also present on the Subject Property.

5.3.3 Geology and Hydrology

Based on soil survey maps published by the USDA Soil Conservation Service, soils at the Subject Property are mapped as:

- Crockett loam, 1 to 3 percent slopes
- Crockett loam, 2 to 5 percent slopes
- Bazette clay loam, 3 to 5 percent slopes
- Wilson clay loam, 0 to 2 percent slopes
- Nahatche soils

Based on U.S. Geological Survey (USGS) maps, the Subject Property is underlain by the following geologic units:

- Wills Point Formation

Water generally flows toward the center of the northern portion of the Subject Property and to the southeast in the southern portion. No on-site water wells or springs were observed during the Subject Property reconnaissance. The nearest surface water in the vicinity of the Subject Property is Cedar Creek, located in the central portion of the Subject Property. According to the Texas Water Development Board there is one recorded well within a one-mile radius of the Subject Property. Two unused brick and mortar wells are located on the property (**Appendix A, Figure 2** and **Appendix B, Photos 12**). Multiple stock ponds are present on the Subject Property.

5.4 HISTORICAL USE

The objective of reviewing historical resources is to develop a history of the previous uses of the Subject Property and surrounding area to help identify the likelihood of past uses that might have led to RECs in connection with the Subject Property.

5.4.1 Historical Summary

Historical information identifying the past use of the Subject Property was obtained from various sources as detailed in **Appendix C** and includes aerial photographs, topographic maps, and city directories.

Historical Summary			
Period	Source	Subject Property Uses	Adjoining Property Uses
1956	USGS 7.5-minute topographic maps	In 1956, the property is mostly undeveloped. Five structures are mapped on the Subject Property with dirt roads/two-tracks leading to them from county roads and highways.	The adjacent properties are agricultural and rural residential.
2016-2019	USGS 7.5-minute topographic maps	The maps do not depict structures, just roadways and natural features.	The maps do not depict structures, just roadways and natural features.
1941-1949	ASCS and AMS aerial photographs	In 1941, The Subject Property is used for agriculture and rural residences. Four homesteads/residential compounds are present, three in the northern portion and one in the southern portion off of County Road 1525. No changes are noted in 1949.	The surrounding properties are undeveloped or used for agriculture.
1954-1975	ASCS and USGS aerial photographs	No changes are noted in 1954 from previous years. In 1966, the homesteads are no longer present, except for the one in the southern portion of the Subject Property. In 1975, residual abandoned buildings are visible at the sites of several of the homesteads.	In 1975, additional development of industrial metal finishing buildings east of the southern portion of the Subject Property is apparent. A square holding pond is present on the eastern boundary of the southern portion of the Subject Property.
1985-1995	USGS aerial photographs	No changes are noted on the Subject Property.	With the exception of rural residential development, no changes are noted in the surrounding properties.
2003-2022	USDA aerial photographs	In 2003, multiple dirt roads are observed crossing the northern portion of the Subject Property. No significant changes are observed in subsequent years.	Residential development on the north side of Point and rural residential development in the surrounding areas is observed.

Period	Source	Subject Property Uses	Adjoining Property Uses
1996-2022	City Directory	No concerns identified on the City Directory.	N/A

5.4.2 Previous Environmental Reports

Stantec completed a Phase I ESA in May 2023 for the northern portion of the Subject Property. Information from this Phase I ESA has been incorporated as appropriate throughout this document.

5.4.3 Title Records

No title records were provided by the user/client. Please refer to the Records Review section for current and historical ownership/use of the Subject Property.

5.4.4 Other Historical Records

No other historical records were reviewed for the preparation of this report.

5.5 ENVIRONMENTAL LIENS AND ACTIVITY/USE LIMITATIONS

The User did not report any environmental liens or activity and use restrictions associated with the Subject Property. An environmental lien search was not included in the scope of this assessment.

5.6 VAPOR ENCROACHMENT EVALUATION

A review of the standard environmental records and historical use records indicated that there are no vapor encroachment conditions (VECs) affecting the subject property. No sites with contaminants of concern (COCs) were identified within the area of concern (AOC), which is defined as upgradient and within 1/3 of a mile of the Subject Property. However, one site, AAA Wire Products, located approximately 0.31 miles east of the project area was identified to potentially have contaminants of concern. This site is not located in the AOC because it is not considered upgradient. A vapor report is included as **Appendix E** of this report.

Standard Environmental Records	Maximum Search Distance*	Property Total	Total within 1/10 mile from Property	Total between 1/10-1/3 mile from Property
Federal NPL	0.333	0	0	0

6.0 SITE RECONNAISSANCE

The site reconnaissance was conducted on June 8, 2023, by Clint Wardlow, Ecologist with Stantec. Weather conditions at the time of the site reconnaissance were 95 degrees and sunny. Photographs of pertinent features identified during the site reconnaissance are included in **Appendix B**.

6.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of observing the Subject Property boundaries and systematically traversing the Subject Property to provide an overlapping field of view wherever possible. The site reconnaissance consisted of walking and visually observing the Subject Property. The adjoining properties were visually observed from the Subject Property or public right of way but were not entered.

6.2 GENERAL SUBJECT PROPERTY SETTING

The Subject Property consists of approximately 911.14 acres and is mostly undeveloped or used for agricultural purposes. The ground surface at the site slopes gently downward to the south and southeast. Groundcover consists primarily of the agricultural fields, pastures, and wooded areas. A natural gas pipeline and electrical transmission line crosses the Subject Property. The Subject Property is accessed from the west via an entrance from Farm to Market Road 2737 and from the south via County Road 1525.

6.3 SITE VISIT FINDINGS

6.3.1 Hazardous Substances

No hazardous substances were observed on the Subject Property during the site reconnaissance.

6.3.2 Petroleum Products

No petroleum products were identified on the Subject Property during the site reconnaissance.

6.3.3 USTs

During the site reconnaissance, no evidence of underground storage tanks (USTs) was identified on the Subject Property.

6.3.4 ASTs

No aboveground storage tanks (ASTs) were observed on the Subject Property during the site reconnaissance.

6.3.5 Other Suspect Containers

No other suspect containers were identified on the Subject Property during the site reconnaissance.

6.3.6 Equipment Likely to Contain PCBs

Tractors with hydraulic equipment were observed on the Subject Property in association with hay production operations. Hydraulic fluid can contain PCBs. No leaks were observed during the site reconnaissance.

6.3.7 Interior Staining/Corrosion

No interior staining or corrosion was observed in buildings on the Subject Property during the site reconnaissance.

6.3.8 Discharge Features

During the site reconnaissance, no discharge features (floor drains, catch basins, oil/water separators, etc.) were observed on the Subject Property.

6.3.9 Pits, Ponds, And Lagoons

Several stock ponds were observed on the Subject Property during the site reconnaissance. No potential hazardous materials concerns were observed.

6.3.10 Solid Waste Dumping/Landfills

With the exception of minor residential and agricultural debris, including barbed wire and scrap metal (**Appendix A, Figure 2, and Appendix B, Photos 07, 08, 09, and 11**) no evidence of solid waste dumping, suspect fill material, or landfills was identified on the Subject Property during the site reconnaissance. There were no indications of hazardous materials associated with any debris.

6.3.11 Stained Soil/Stressed Vegetation

No stained soil/stressed vegetation (from something other than dry growing conditions) was observed on the Subject Property during the site reconnaissance.

6.3.12 Wells

Two old brick and mortar wells were observed on the southern portion of the Subject Property during the site reconnaissance (**Appendix A, Figure 2 and Appendix B, Photos 12**).

6.3.13 Other

No other hazardous materials concerns were observed during the site reconnaissance.

7.0 INTERVIEWS

The following interviews were conducted with the User, Owner, Site Manager, State and local government officials, and/or other knowledgeable persons.

7.1 INTERVIEW WITH USER

User representative Stephanie Martin completed a User questionnaire on March 3, 2023. No hazardous materials concerns were identified by the user. User-provided information is discussed in **Section 4.0** and has been incorporated as appropriate throughout the report. The questionnaire can be found in **Appendix F**.

7.2 INTERVIEW WITH OWNER AND SITE MANAGER

The landowner of the Barrett parcels in the northern portion of the Subject Property, Linda Barrett, completed an Owner Questionnaire on April 10, 2023. She provided no information regarding hazardous material concerns at the Subject Property. Landowner Joe Humphrey filled out an Owner Questionnaire on June 22, 2023. They mentioned that DDT was in use on the land in the 1950s and 60s in association with cotton production. After cotton production was ended, wheat and other grains were grown. The rancher currently leasing the property has used herbicide sprayers to control honey locust populations on the property. No releases were reported by Mr. Humphrey. Because these agricultural chemicals were used in accordance with manufacturer specifications, they are not considered a REC. Landowner James Dowell filled out an owner questionnaire on June 22, 2023. He provided no information regarding hazardous material concerns at the Subject Property. Information obtained during the interview process has been incorporated as appropriate throughout the report. Interview documentation can be found in **Appendix F**.

7.3 INTERVIEWS WITH STATE AND LOCAL GOVERNMENT OFFICIALS

Stantec placed an Open Record Request with the Point Volunteer Fire Department regarding environmental incidents concerning the Subject Property. No response has been received as of the drafting of this report. Any response that affects the findings of this report will be forwarded to the User. A copy of the correspondence is provided in **Appendix F**.

8.0 FINDINGS AND OPINIONS

This study was performed in general accordance with the American Society of Testing and Material (ASTM) Standard Practice for Environmental Site Assessment, E 1527-21. The objective of the study was to identify RECs. The term "recognized environmental conditions" (RECs) is defined as: 1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. RECs are not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

The following RECs were identified in connection with the subject property:

- None

The following controlled RECs were identified in connection with the subject property:

- None

The following historical RECs were identified in connection with the subject property:

- None

The following *de minimis* conditions were identified in connection with the subject property:

- None

The following data gaps or failures were identified:

- A historical data gap was encountered during the review of the previous land uses. Topographic maps and aerial photographs were not available in five-year increments. However, the land use was determined to be primarily agricultural and little change occurred between 1941 and present.
- The Point Volunteer Department was contacted regarding hazardous materials releases on the Subject Property. No response was received from the VFD as of the drafting of this report. Any response that affects the findings of this report will be forwarded to the User.

Based on the information obtained during the course of this ESA and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions. No other data gaps or deviations from the recommended scope of ASTM Standard E 1527-21 occurred as part of this Phase I ESA with the exception of any additions noted in the Scope of Work.

Additional findings:

- Two old brick and mortar water wells or cisterns were observed on the southern portion of the Subject Property during the site reconnaissance (**Appendix A, Figure 2** and **Appendix B, Photo 12**). No hazardous materials concerns were observed to be associated with these structures.
- Minor dumping of barbed wire, concrete cinderblocks, plastic debris and scrap metal was observed on the Subject Property (**Appendix A, Figure 2**, and **Appendix B, Photos 01, 02, 07, 08, 09, and 11**). No hazardous materials were observed.
- A water treatment facility for the town of Point is located adjacent to the southeastern boundary of the Subject Property (**Appendix A, Figure 2, Appendix B, Photo 03, and Appendix D**). The database search returned Notices of Violation (NOVs) and Notices of Enforcement (NOEs) for this plant related to unauthorized discharges of sewage and failure to monitor effluent water quality. Any discharge from the plant flows into a ravine or creek east of the plant. This water flows south

and west and does not enter the Subject Property. Sewage is not considered a hazardous material and releases at this site are not considered RECs or *de minimis*. There is no hazardous material threat to the Subject Property associated with this site.

- Oil and gas exploration activities have occurred at the subject property in the past. The oil and gas activities at the subject property have the potential to incur past releases, and it cannot be assumed that all releases have been documented. However, based on the review of current and available sources, this assessment did not indicate the presence or likely presence of a past or current hazardous material release, or conditions that may pose a material threat of a future release at the subject property. It should be noted that contamination of Total Petroleum Hydrocarbons (TPH), Benzene, Toluene, Ethylbenzene and Xylenes (BTEX), heavy metals, and/or Naturally Occurring Radioactive Materials (NORMs) are common in areas where oil and gas exploration has occurred including, but not limited to, well sites, tank battery sites, product transport sites, and reserve/waste pits. The concentration of contaminants may be minor, or potentially be present at levels that would require additional management or remedial action during construction or operation. If greater certainty regarding potential impacts and comparison to agency health screening levels or waste disposal criteria is desired, then sampling and testing can be conducted.

9.0 CONCLUSIONS

Stantec performed a Phase I ESA of the Subject Property in conformance with the scope and limitations of ASTM Standard Practice E 1527-21. This assessment has revealed no evidence of recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), or historical recognized environmental conditions (HRECs) in connection with the Subject Property.

10.0 SIGNATURES

This document entitled Phase I Environmental Site Assessment Barrett Solar Rains County, Texas (Report) was prepared by Stantec Consulting Services Inc. ("Stantec") for the account of BT Barrett Solar, LLC (the "Client"). The conclusions in the Report are Stantec's professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient's own risk.

Stantec has assumed all information received from the "Client" and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec's contract with the Client. While the Report may be provided to applicable authorities having jurisdiction and others for whom the Client is responsible, Stantec does not warrant the services to any third party. The report may not be relied upon by any other party without the express written consent of Stantec, which may be withheld at Stantec's discretion.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

SEMS List 8R Active Site Inventory:

SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List:[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs:[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Federal Institutional Controls- ICs:[FED INST](#)

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Jan 25, 2023

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property:

[SEMS LIEN](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Dec 22, 2022

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

Superfund Sites Boundaries:

[SUPERFUND](#)

List of sites that may constitute an imminent and substantial endangerment to public health and safety or the environment due to a release or threatened release of hazardous substances into the environment provided by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Aug 10, 2021

State Superfund Registry:

[SHWS](#)

List of sites identified or evaluated by the Texas Commission on Environmental Quality (TCEQ) which may constitute an imminent and substantial endangerment to public health and safety or to the environment due to a release or threatened release of hazardous substances into the environment. The TCEQ updates the state Superfund sites list in accordance with the Texas Health and Safety Code (THSC). This database is state equivalent NPL.

Government Publication Date: Mar 2, 2023

Delisted State Superfund Registry List:

[DELISTED SHWS](#)

This database contains a list of closed hazardous substance release sites that were removed from the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 7, 2023

Permitted Solid Waste Facilities:

SWF/LF

List of active, inactive, and post-closure Municipal Solid Waste landfills and processing facilities with issued permits and authorizations, as well as pending, withdrawn, or denied applications registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 330.

Government Publication Date: Jan 27, 2023

Closed Landfill Inventory:

CLI

Inventory of permitted and unauthorized closed or abandoned municipal solid waste landfills throughout Texas compiled by the Texas Commission on Environmental Quality (TCEQ), in collaboration with regional Councils of Government (COG).

Government Publication Date: Feb 1, 2022

Houston-Galveston Closed Landfill Inventory:

HGAC CLI

List of closed and abandoned landfill sites which fall under the Houston Galveston Area Council of Government. Texas Councils of Governments (COGs) are required to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

Government Publication Date: Oct 19, 2022

AACOG Closed Landfill Inventory:

AACOG CLI

A list of permitted and unpermitted closed landfill sites made available by the Alamo Area Council of Governments (AACOG). Alamo Area Council of Governments (AACOG) is requested to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

Government Publication Date: Feb 6, 2020

Commercial Management Facilities for Hazardous Waste and Industrial Solid Wastes:

IHW

This publication lists facilities that have permits or authorizations from the Texas Commission on Environmental Quality (TCEQ) to receive, on a commercial basis, and manage hazardous waste, industrial nonhazardous waste, or both.

Government Publication Date: Dec 1, 2020

Industrial and Hazardous Waste - Receivers:

IHW RECEIVER

List of active, inactive, and post-closure Industrial and Hazardous Waste Receiver Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Mar 14, 2023

Radioactive Waste Sites:

RWS

This Texas Commission on Environmental Quality (TCEQ) database contains all sites in the State of Texas designated as Radioactive Waste sites as of 2006. The TCEQ no longer maintains this site listing.

Government Publication Date: Jul 11, 2006

Leaking Petroleum Storage Tank Database:

LPST

List of cleanup sites where contamination was caused by spills, leaks, or other releases of petroleum or hazardous substances from underground and/or aboveground storage tanks regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Feb 7, 2023

Delisted Leaking Storage Tanks:

DELISTED LST

This database contains a list of leaking storage tank sites that were removed from the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Feb 7, 2023

Underground Petroleum Storage Tanks:

UST

List of facilities that have one or more Underground Storage Tank (UST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 27, 2023

Aboveground Storage Tanks:

AST

List of facilities that have one or more Aboveground Storage Tank (AST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 27, 2023

Petroleum Storage Tanks Database:

PST

List of facilities included on the list of tank facilities made available by the Texas Commission on Environmental Quality (TCEQ) that have no association as either underground or aboveground tanks.

Government Publication Date: Mar 27, 2023

Historical Tank Construction Notification:

[HIST TANK](#)

A list of facilities with historic petroleum storage tank construction notification activity made available by the Texas Commission on Environmental Quality (TCEQ). Any person who intends either to install a new or replacement underground storage tank (UST), to remove a UST from the ground, to conduct a permanent abandonment in-place of a UST, or make any repairs or improvements of a UST must submit a Construction Notification Form.

Government Publication Date: Mar 27, 2023

Austin Underground Storage Tanks:

[UST AUSTIN](#)

A list of underground gas storage tanks both current and historical from the City of Austin Open Data Portal. Data provided by Planning and Zoning, City of Austin.

Government Publication Date: Apr 12, 2023

Salt Caverns for Petroleum Storage:

[PETROL CAVERN](#)

Listing of salt caverns for petroleum storage, made available by the Railroad Commission of Texas. Salt caverns, constructed in naturally occurring salt domes or salt beds, are used as storage for hydrocarbons including crude oil and natural gases.

Government Publication Date: Sep 1, 2006

Delisted Storage Tanks:

[DTNK](#)

This database contains a list of storage tank sites that were removed from the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Apr 12, 2023

Sites with Controls:

[AUL](#)

Sites under several Texas Commission on Environmental Quality (TCEQ) remediation programs which have institutional or engineering controls.

Government Publication Date: Feb 8, 2023

Voluntary Cleanup Program:

[VCP](#)

List of sites which have participated or are currently participating in the Voluntary Cleanup Program (VCP) administered by the Texas Commission on Environmental Quality (TCEQ). The VCP provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas.

Government Publication Date: Feb 27, 2023

Texas Railroad Commission Voluntary Cleanup Program:

[VCP RRC](#)

List of facilities which have participated in or are currently participating in the Voluntary Cleanup Program (VCP) operated by the Railroad Commission of Texas (RRC). The RRC VCP provides an incentive to remediate Oil & Gas related pollution.

Government Publication Date: Feb 14, 2023

Operator Cleanup Program:

[OP CLEANUP](#)

A list of sites in the Texas Railroad Commission (RRC)'s Operator Cleanup Program (OCP). The OCP, under the Site Remediation Section, is tasked with oversight of complex pollution cleanups performed by the oil and gas industry. Complex sites include those that occur in sensitive environmental areas as defined by 16 TAC3.91 (SWR 91) and may require site specific cleanup levels based on risk. When cleanup activities are successfully completed by the operator, Commission staff may issue a "No Further Action" letter acknowledging completion.

Government Publication Date: Mar 7, 2023

Innocent Owner/Operator Program:

[IOP](#)

A list of sites in the Innocent Owner/Operator Program (IOP) made available by Texas Commission of Environmental Quality (TCEQ). IOP provides certificates to innocent owners or operators whom their properties are contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

Government Publication Date: Feb 20, 2023

Brownfields Site Assessments Database:

[BROWNFIELDS](#)

The Texas Commission on Environmental Quality (TCEQ) Brownfields Site Assessment Program (BSA) layer is used to identify the geographic location of all "Active and Inactive BSA" sites within the State of Texas.

Government Publication Date: Jan 2, 2023

Texas Railroad Commission Brownfields:

[BROWN RRC](#)

List of sites which have participated or are currently participating in the Railroad Commission of Texas (RRC) Brownfields Response Program (BRP). The RRC BRP provides technical and financial support for redevelopment of abandoned oil and gas sites.

Government Publication Date: Feb 14, 2023

Municipal Setting Designation:

[MSD](#)

Municipal Setting Designations (MSD) list is maintained by Texas Commission on Environmental Quality (TCEQ). An MSD is an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level.

Government Publication Date: Feb 20, 2023

Tribal

Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:

[INDIAN LUST](#)

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 6, which includes Texas, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 6, 2017

Underground Storage Tanks on Tribal/Indian Lands:

[INDIAN UST](#)

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 6, which includes Texas, is provided by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Leaking Storage Tanks:

[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Underground Storage Tanks:

[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites:

[PFAS NPL](#)

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Dec 28, 2022

Federal Agency Locations with Known or Suspected PFAS Detections:

[PFAS FED SITES](#)

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. Sites on this list do not necessarily reflect the source/s of contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Jun 30, 2022

SSEHRI PFAS Contamination Sites:

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills:

[ERNS PFAS](#)

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

PFAS NPDES Discharge Monitoring:

[PFAS NPDES](#)

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities:

[PFAS TSCA](#)

The US Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) requiring facilities that manufacture or import chemical substances to report to EPA. This list is specific to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl substances (PFAS). Data file made available by the EPA and includes CDR/Inventory Update Reporting data from 1998 up to 2020. EPA makes notes the following about these data: this data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jun 20, 2022

PFAS Waste Transfers from RCRA e-Manifest :

[PFAS E-MANIFEST](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors:

[PFAS IND](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Aug 30, 2022

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites:

FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

DOE Legacy Management Sites:

[LM SITES](#)

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations:

[ALT FUELS](#)

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG) fuel type locations.

Government Publication Date: Jan 3, 2023

Superfunds Consent Decrees:

[CONSENT DECREES](#)

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jan 11, 2023

Air Facility System:

[AFS](#)

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers:

[PCBT](#)

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Dry Cleaner Remediation Program Prioritization List:

PRIORITY CLEAN

The Texas Commission on Environmental Quality (TCEQ) implements environmental standards for dry cleaners. The Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents. Includes prioritized sites identified under the DCRP, as well as sites closed under the DCRP.

Government Publication Date: Mar 1, 2023

Registered Dry Cleaning Facilities:

DRYCLEANERS

The Texas Commission of Environment Quality (TCEQ) maintains a statewide registration list of current dry cleaners.

Government Publication Date: Mar 1, 2023

Delisted Drycleaning Facility List:

DELISTED DRYCLEANERS

A list of sites which have been removed from the list of dry cleaning facilities registered with the Texas Commission of Environment Quality (TCEQ). Sites are removed when they are no longer used as dry cleaning facilities.

Government Publication Date: Mar 1, 2023

Groundwater Contamination Cases:

GWCC

List of sites present in the TCEQ Groundwater Contamination Viewer, which represent groundwater contamination cases in Texas as per TCEQ publication SFR-056 (current and some previous years). The Joint Groundwater Monitoring and Contamination Report (SFR-056) was designed and produced by the Texas Groundwater Protection Committee in fulfillment of requirements given in Section 26.406 of the Texas Water Code. The information does not represent an on-the-ground survey and represents only the approximate relative location of property boundaries.

Government Publication Date: Dec 31, 2021

Historical Groundwater Contamination Cases:

GWCC HIST

List of sites from a Joint Groundwater Monitoring and Contamination Report provided by the Texas Commission on Environmental Quality (TCEQ) with the Railroad Commission of Texas (RRC). The annual report describes the status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report provides a general overview of groundwater monitoring by participating members on a program by program basis. Groundwater contamination is broadly defined in the report as any detrimental alteration of the naturally occurring quality of groundwater.

Government Publication Date: Dec 31, 2018

Affected Property Assessment Reports:

APAR

List of sites for which an Affected Property Assessment Report has been submitted to the Texas Commission on Environmental Quality (TCEQ). An APAR is required when a person is addressing a release of COCs under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and chemicals of concern (COCs), determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary.

Government Publication Date: Mar 24, 2023

Spills Database:

SPILLS

List of Spills reported to Emergency Response Division of the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: May 1, 2023

Per- and Polyfluoroalkyl Substances (PFAS):

PFAS

A list of sites from the Central Registry and ARTS databases where Per- and Polyfluoroalkyl substances (PFAS) containing materials may be of concern. This list is made available by the Remediation Division of the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: May 18, 2022

Industrial and Hazardous Waste Sites with Corrective Actions:

IHW CORR ACTION

List of Industrial and Hazardous Waste sites with Corrective Actions made available by the Texas Commission of Environment Quality (TCEQ). The mission of the industrial and hazardous waste (IHW) corrective action program is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes.

Government Publication Date: Feb 27, 2023

Land Application Permits:

LAND APPL

Texas Land Application Permits are a requirement from the Texas Commission on Environmental Quality for any domestic facility that disposes of treated effluent by land application such as surface irrigation, evaporation, drainfields or subsurface land application.

Government Publication Date: Apr 17, 2023

Notice of Violation:

NOV

List of sites that have been sent a Notice of Violation (NOV) by the Texas Commission on Environmental Quality (TCEQ) Office of Compliance and Enforcement. A Notice of Violation is sent out when a site falls out of compliance and has a prescribed time period to return to compliance.

Government Publication Date: May 2, 2022

Notices of Enforcement:

NOE

Listing of investigations resulting in a Notice of Enforcement (NOE), made available by the Texas Commission on Environmental Quality, Office of Compliance & Enforcement. Multiple violations may be due to identified noncompliance with different regulatory requirements (citations).

Government Publication Date: Jul 5, 2022

Environmental Liens Listing:

LIENS

List of sites/facilities against which the Texas Commission on Environmental Quality (TCEQ) has placed liens to recover cleanup costs associated with Federal or State Superfund cleanup activities.

Government Publication Date: Feb 8, 2023

Court Orders & Administrative Orders:

ORD

List of sites that have been sent an Administrative Order or Court Order by the Texas Commission on Environmental Quality (TCEQ) Office of Compliance and Enforcement.

Government Publication Date: Feb 14, 2023

Inactive Regulated RCRA Generator Facilities:

HIST RCRA GEN

A list of facilities which were once registered as generators of hazardous waste, but are no longer active or no longer require registration. The U.S. Environmental Protection Agency (EPA) requires the Texas Commission on Environmental Quality (TCEQ) to investigate hazardous waste generators. If an unregistered/inactive industrial site generates less than 220 pounds of hazardous or Class 1 industrial waste, it does not have to notify or report to the TCEQ.

Government Publication Date: Oct 7, 2022

Recycle Texas Online Program:

RTOL

A list of recycling facilities under the Recycle Texas Online service/program made available by the Texas Commission of Environmental Quality (TCEQ). This program allowed facilities to self-report and post their own company/facility information. This program is no longer maintained and these data will not be updated.

Government Publication Date: Oct 10, 2011

Underground Injection Control:

UIC

List of underground injection control (UIC) permits in the Texas Commission on Environmental Quality (TCEQ) Central Registry database. Includes Class I, Class III, Class IV, Class 5, and non permitted UICs; does not include injection wells regulated by the Railroad Commission of Texas.

Government Publication Date: Jan 19, 2023

Industrial and Hazardous Waste - Generators:

IHW GENERATOR

List of active, inactive, and post-closure Industrial and Hazardous Waste Generator Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Mar 14, 2023

Industrial and Hazardous Waste - Transporters:

IHW TRANSPORT

List of active, inactive, and post-closure Industrial and Hazardous Waste Transporter Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Mar 14, 2023

New Source Review (NSR) Permits:

AIR PERMITS

A list of facilities that have applied for New Source Review air permits made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Feb 14, 2023

Point Source Emissions Inventory:

EMISSIONS

A list of Texas Commission on Environmental Quality (TCEQ) Point Source Emissions Inventory sites. The Point Source Emissions Inventory is an annual survey of chemical plants, refineries, electric utility plants and other industrial sites that meet the reporting criteria in the TCEQ emissions inventory rule (30 TAC §101.10Exit the TCEQ).

Government Publication Date: Apr 25, 2022

Tier 2 Report:

TIER 2

Historical listing of facilities in Texas that store hazardous chemicals and are required to report them under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. This data was provided by the Department of State Health Services (DSHS) and contains facility reports for the 2005 through the 2012 calendar years. Since 2012, agencies are unable to release this listing, as Tier II information is confidential under Texas Government Code Chapter 418, the Texas Disaster Act (TDA). Site specific inquiries can be made to the Texas Commission on Environmental Quality Tier II Chemical Reporting Division.

Government Publication Date: Dec 31, 2012

Edwards Aquifer Permits:

EDWARDS AQUIFER

Listing of Edwards Aquifer permits made available by the Texas Commission on Environmental Quality (TCEQ). The Edwards Aquifer is home to diverse fauna and is a drinking water source for the city of San Antonio and surrounding central Texas communities. Before building on the recharge, transition, or contributing zones of the Edwards Aquifer, a plan must first be reviewed and approved by the TCEQ Edwards Aquifer Protection Program.

Government Publication Date: May 23, 2022

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

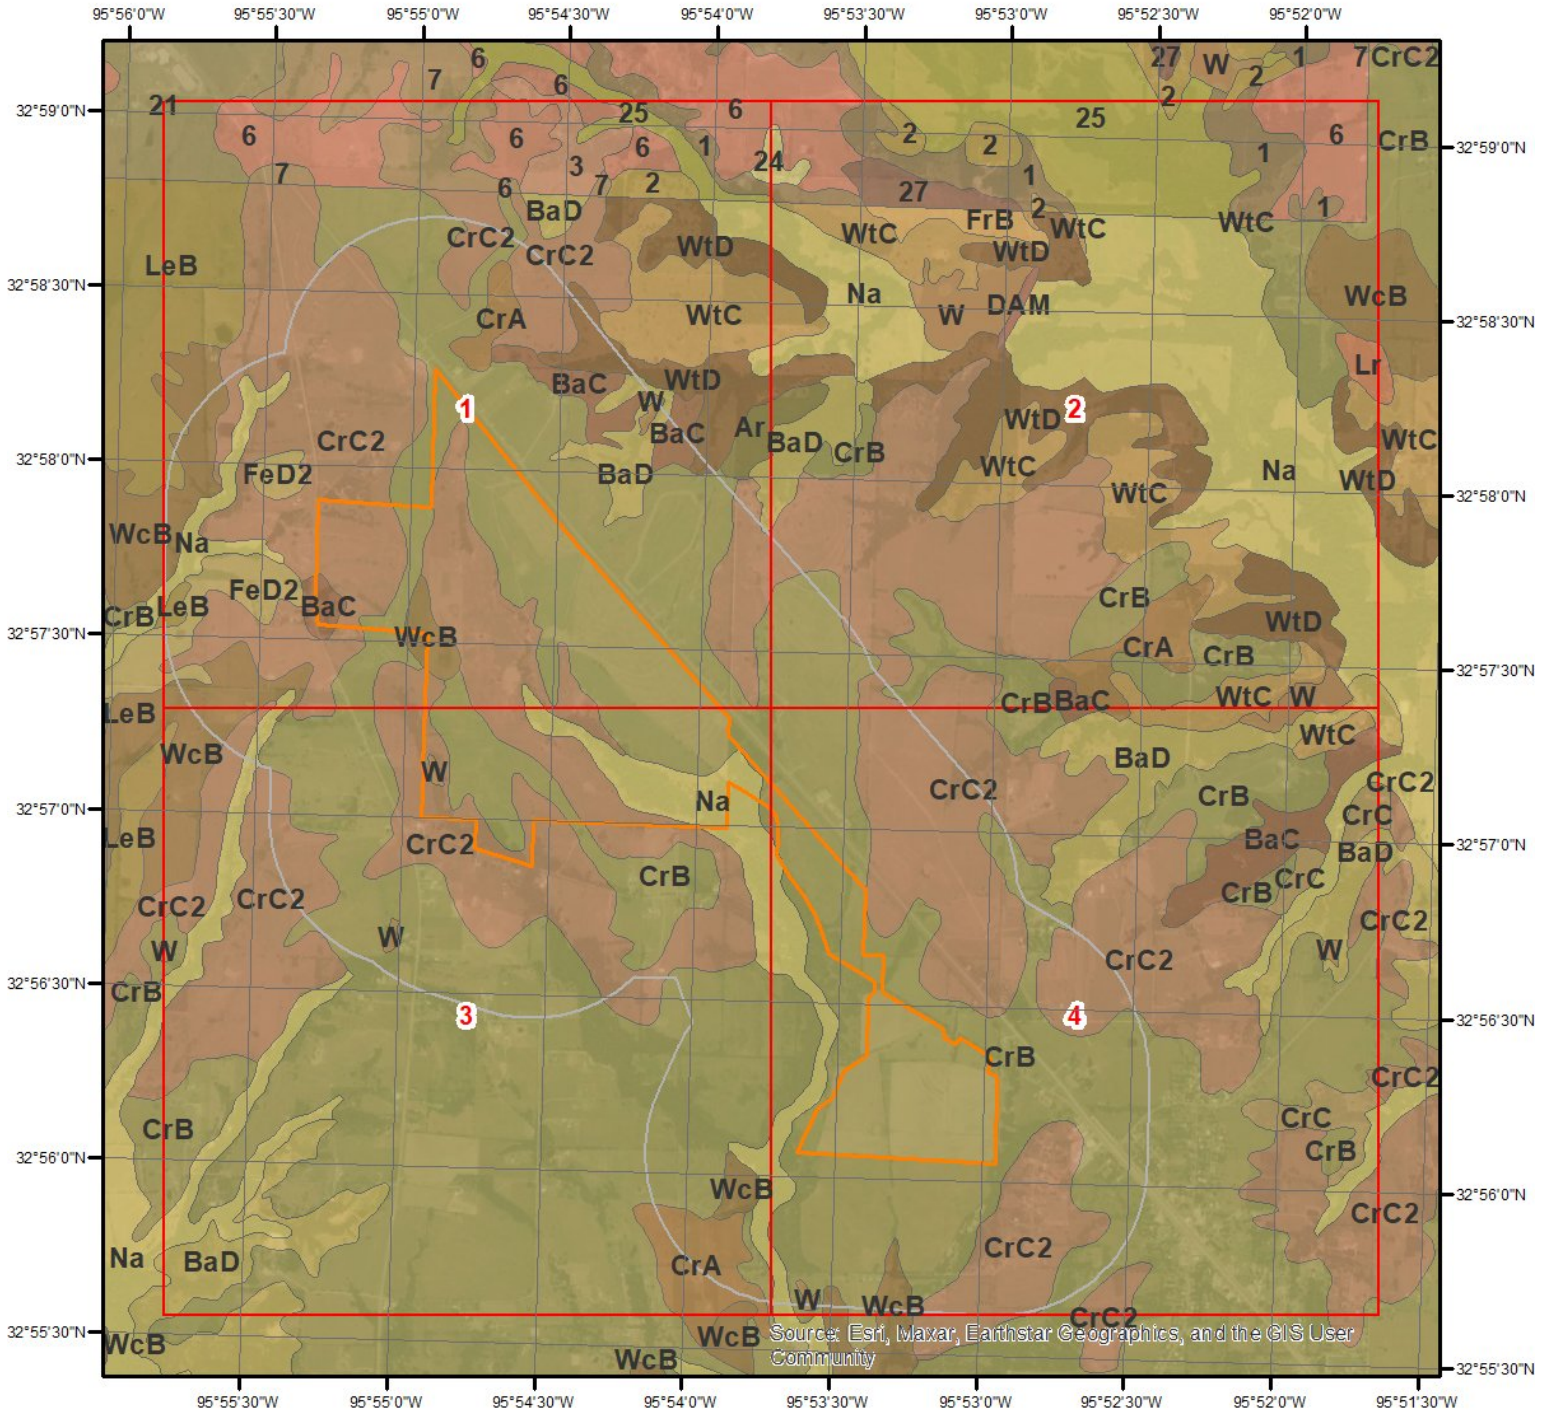

Geologic Unit PAK

Unit Name:	Kincaid Formation
Unit Age:	Phanerozoic Cenozoic Tertiary Paleocene
Primary Rock Type:	sand
Secondary Rock Type:	clay or mud
Unit Description:	Kincaid Formation

Geologic Unit PAw

Unit Name:	Wills Point Formation
Unit Age:	Phanerozoic Cenozoic Tertiary Paleocene
Primary Rock Type:	clay or mud
Secondary Rock Type:	limestone
Unit Description:	Wills Point Formation

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit BaC (0.28%)

Map Unit Name:	Bazette clay loam, 3 to 5 percent slopes
Bedrock Depth - Min:	61cm
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Bazette(100%)	
horizon H1(0cm to 13cm)	Clay loam
horizon H2(13cm to 61cm)	Clay
horizon H3(61cm to 152cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: BaC - Bazette clay loam, 3 to 5 percent slopes

Component: Bazette (100%)

The Bazette component makes up 100 percent of the map unit. Slopes are 3 to 5 percent. This component is on ridges on inland dissected coastal plains. The parent material consists of clayey residuum weathered from clayey shale of the Midway group. Depth to a root restrictive layer, bedrock, densic, inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R086AY003TX Northern Claypan Prairie ecological site. Nonirrigated land capability classification is 4e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Map Unit BaD (0.43%)

Map Unit Name:	Bazette clay loam, 5 to 12 percent slopes
Bedrock Depth - Min:	71cm
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Bazette(90%)	
horizon H1(0cm to 10cm)	Clay loam
horizon H2(10cm to 71cm)	Clay
horizon H3(71cm to 152cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: BaD - Bazette clay loam, 5 to 12 percent slopes

Component: Bazette (90%)

The Bazette component makes up 90 percent of the map unit. Slopes are 5 to 12 percent. This component is on ridges on inland dissected coastal plains. The parent material consists of clayey residuum weathered from clayey shale of the Midway group. Depth to a root restrictive layer, bedrock, densic, inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is

Soil Information

not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R086AY003TX Northern Claypan Prairie ecological site. Nonirrigated land capability classification is 6e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Nahatche (5%)

Generated brief soil descriptions are created for major soil components. The Nahatche soil is a minor component.

Component: Gladewater (5%)

Generated brief soil descriptions are created for major soil components. The Gladewater soil is a minor component.

Map Unit CrA (0.43%)

Map Unit Name:	Crockett loam, 0 to 1 percent slopes
Bedrock Depth - Min:	119cm
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Crockett(100%)

horizon H1(0cm to 15cm)	Loam
horizon H2(15cm to 58cm)	Clay
horizon H3(58cm to 119cm)	Clay
horizon H4(119cm to 213cm)	Clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: CrA - Crockett loam, 0 to 1 percent slopes

Component: Crockett (100%)

The Crockett component makes up 100 percent of the map unit. Slopes are 0 to 1 percent. This component is on ridges on inland dissected coastal plains. The parent material consists of residuum weathered from shale of Tertiary age. Depth to a root restrictive layer, bedrock, densic, inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R086AY003TX Northern Claypan Prairie ecological site. Nonirrigated land capability classification is 3s. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 7 within 30 inches of the soil surface.

Map Unit CrB (77.49%)

Map Unit Name:	Crockett loam, 1 to 3 percent slopes
Bedrock Depth - Min:	135cm
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Crockett(85%)

horizon A(0cm to 20cm)	Loam
horizon Btss(20cm to 63cm)	Clay
horizon Btkss(63cm to 114cm)	Clay
horizon Bck(114cm to 135cm)	Clay
horizon Cdk(135cm to 184cm)	Clay loam

Soil Information

Component Description:

Minor map unit components are excluded from this report.

Map Unit: CrB - Crockett loam, 1 to 3 percent slopes

Component: Crockett (85%)

The Crockett component makes up 85 percent of the map unit. Slopes are 1 to 3 percent. This component is on broad ridges on dissected plains. The parent material consists of loamy residuum weathered from shale of Cretaceous age. Depth to a root restrictive layer, bedrock, densic, is 43 to 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R086AY003TX Northern Claypan Prairie ecological site. Nonirrigated land capability classification is 3e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 7 within 30 inches of the soil surface.

Component: Normangee (10%)

Generated brief soil descriptions are created for major soil components. The Normangee soil is a minor component.

Component: Wilson (5%)

Generated brief soil descriptions are created for major soil components. The Wilson soil is a minor component.

Map Unit CrC2 (11.45%)

Map Unit Name:	Crockett loam, 2 to 5 percent slops, eroded
Bedrock Depth - Min:	89cm
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Crockett(100%)

horizon H1(0cm to 10cm)	Loam
horizon H2(10cm to 46cm)	Clay
horizon H3(46cm to 89cm)	Clay
horizon H4(89cm to 152cm)	Clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: CrC2 - Crockett loam, 2 to 5 percent slops, eroded

Component: Crockett (100%)

The Crockett, eroded component makes up 100 percent of the map unit. Slopes are 2 to 5 percent. This component is on ridges on inland dissected coastal plains. The parent material consists of residuum weathered from shale of Tertiary age. Depth to a root restrictive layer, bedrock, densic, inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R086AY003TX Northern Claypan Prairie ecological site. Nonirrigated land capability classification is 4e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 6 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 7 within 30 inches of the soil surface.

Map Unit FeD2 (0.4%)

Map Unit Name:	Ferris clay, 5 to 12 percent slopes, eroded
Bedrock Depth - Min:	107cm

Soil Information

Watertable Depth - Annual Min: null
Drainage Class - Dominant: Well drained
Hydrologic Group - Dominant: D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Ferris(75%)

horizon A(0cm to 15cm)	Clay
horizon Bkss1(15cm to 76cm)	Clay
horizon Bkss2(76cm to 107cm)	Clay
horizon Cdk(107cm to 193cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: FeD2 - Ferris clay, 5 to 12 percent slopes, eroded

Component: Ferris (75%)

The Ferris, moderately eroded component makes up 75 percent of the map unit. Slopes are 5 to 12 percent. This component is on linear gilgai on ridges on dissected plains. The parent material consists of clayey residuum weathered from mudstone. Depth to a root restrictive layer, bedrock, densic, is 39 to 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is very high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R086AY009TX Southern Eroded Blackland ecological site. Nonirrigated land capability classification is 6e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 16 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Heiden (10%)

Generated brief soil descriptions are created for major soil components. The Heiden soil is a minor component.

Component: Ferris (10%)

Generated brief soil descriptions are created for major soil components. The Ferris, severely eroded soil is a minor component.

Component: Lamar (5%)

Generated brief soil descriptions are created for major soil components. The Lamar soil is a minor component.

Map Unit LeB (1.47%)

Map Unit Name: Leson clay, 1 to 3 percent slopes
Bedrock Depth - Min: 152cm
Watertable Depth - Annual Min: null
Drainage Class - Dominant: Moderately well drained
Hydrologic Group - Dominant: D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Leson(100%)

horizon H1(0cm to 25cm)	Clay
horizon H2(25cm to 76cm)	Clay
horizon H3(76cm to 152cm)	Clay
horizon H4(152cm to 203cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: LeB - Leson clay, 1 to 3 percent slopes

Component: Leson (100%)

Soil Information

The Leson component makes up 100 percent of the map unit. Slopes are 1 to 3 percent. This component is on ridges on dissected plains. The parent material consists of residuum weathered from calcareous shale. Depth to a root restrictive layer, bedrock, densic, is 60 to 80 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. This component is in the R086AY010TX Northern Blackland ecological site. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 18 percent. There are no saline horizons within 30 inches of the soil surface.

Map Unit Na (5.0%)

Map Unit Name: Nahatche soils, frequently flooded
Bedrock Depth - Min: null
Watertable Depth - Annual Min: 31cm
Drainage Class - Dominant: Somewhat poorly drained
Hydrologic Group - Dominant: B/D - These soils have moderately low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Nahatche(95%)	
horizon H1(0cm to 18cm)	Clay loam
horizon H2(18cm to 165cm)	Loam
horizon H3(165cm to 203cm)	Stratified loam to silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Na - Nahatche soils, frequently flooded

Component: Nahatche (95%)

The Nahatche component makes up 95 percent of the map unit. Slopes are 0 to 1 percent. This component is on flood plains on coastal plains. The parent material consists of loamy alluvium of Holocene age. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is frequently flooded. It is not ponded. A seasonal zone of water saturation is at 12 inches during January, February, March, April, May, November, December. Organic matter content in the surface horizon is about 2 percent. This component is in the R087BY007TX Loamy Bottomland ecological site. Nonirrigated land capability classification is 5w. This soil meets hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 3 within 30 inches of the soil surface.

Component: Unnamed (5%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Map Unit W (0.05%)

Map Unit Name: Water

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: W - Water

Component: Water (100%)

Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Map Unit WcB (2.59%)

Soil Information

Map Unit Name: Wilson clay loam, 0 to 2 percent slopes
Bedrock Depth - Min: null
Watertable Depth - Annual Min: null
Drainage Class - Dominant: Moderately well drained
Hydrologic Group - Dominant: D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Wilson(100%)
horizon H1(0cm to 13cm) Clay loam
horizon H2(13cm to 137cm) Clay
horizon H3(137cm to 203cm) Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: WcB - Wilson clay loam, 0 to 2 percent slopes

Component: Wilson (100%)

The Wilson component makes up 100 percent of the map unit. Slopes are 0 to 2 percent. This component is on stream terraces on dissected plains. The parent material consists of clayey alluvium of Quaternary age derived from mixed sources. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R086AY003TX Northern Claypan Prairie ecological site. Nonirrigated land capability classification is 3e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 6 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 5 within 30 inches of the soil surface.

Map Unit WtD (0.42%)

Map Unit Name: Woodtall loam, 5 to 12 percent slopes
Bedrock Depth - Min: null
Watertable Depth - Annual Min: null
Drainage Class - Dominant: Well drained
Hydrologic Group - Dominant: D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Woodtall(85%)
horizon A(0cm to 18cm) Loam
horizon Btss(18cm to 66cm) Clay
horizon BC(66cm to 137cm) Clay loam
horizon C(137cm to 183cm) Clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: WtD - Woodtall loam, 5 to 12 percent slopes

Component: Woodtall (85%)

The Woodtall component makes up 85 percent of the map unit. Slopes are 5 to 12 percent. This component is on ridges on inland dissected coastal plains. The parent material consists of stratified loamy residuum weathered from sandstone and shale and/or stratified clayey residuum weathered from sandstone and shale. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R087BY002TX Claypan Savannah ecological site. Nonirrigated land capability classification is 6e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Soil Information

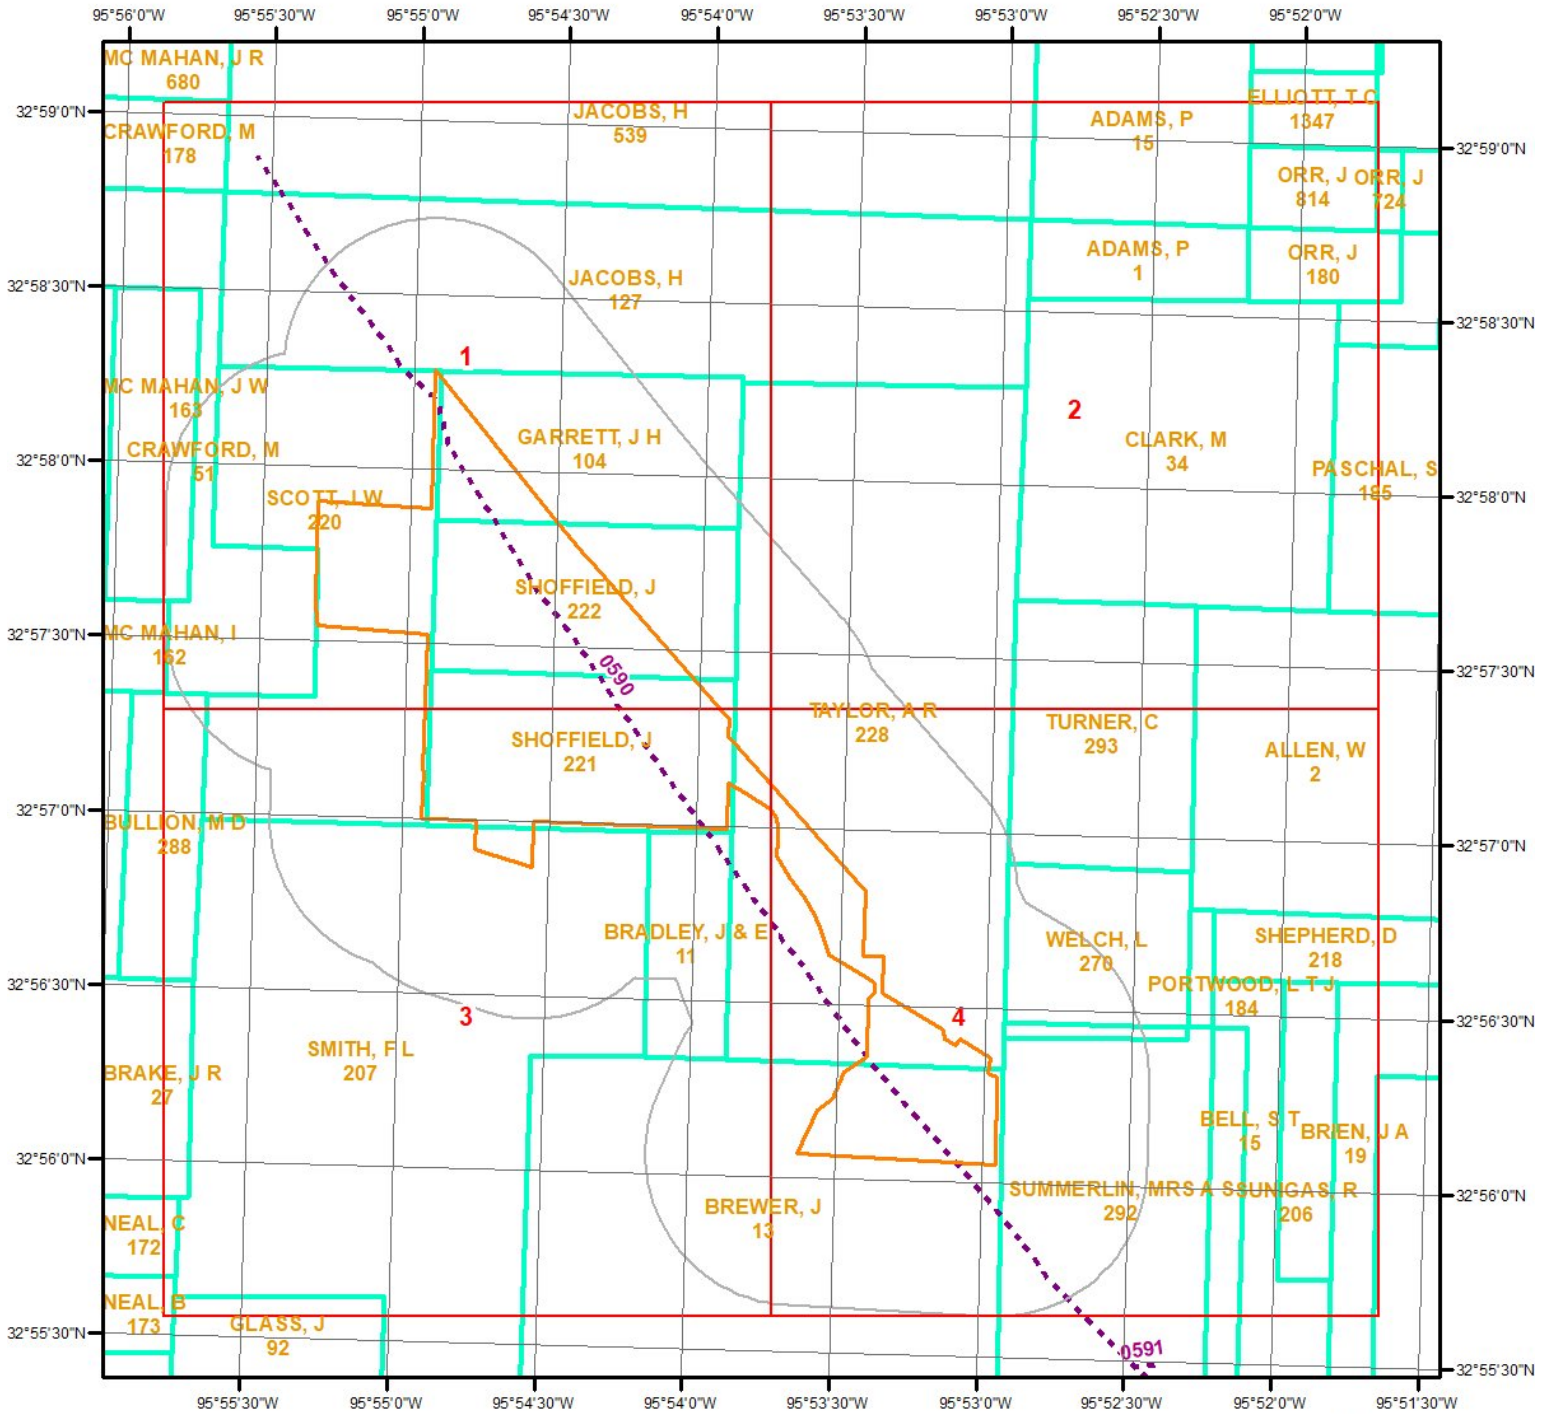

Component: Freestone (10%)

Generated brief soil descriptions are created for major soil components. The Freestone soil is a minor component.

Component: Wolfpen (5%)

Generated brief soil descriptions are created for major soil components. The Wolfpen soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *RAINS* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *RAINS* County

No Measures/Homes:	3
Geometric Mean:	0.3
Arithmetic Mean:	0.3
Median:	0.3
Maximum:	0.3
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the State/EPA Residential Radon Survey of Texas conducted during 1990-91. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

Wells from NWIS

FED USGS

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well, Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

State Sources

Fort Bend Subsidence District Water Wells

WW FORT BEND

List of water wells in the Fort Bend Subsidence District, boundaries of which are defined as all the territory within Fort Bend County. The Fort Bend Subsidence District was created by the Texas Legislature in 1989

Appendix

as a conservation and reclamation district to control land subsidence and manage groundwater resources through regulation, conservation, and coordination with suppliers of alternative water sources to assure an adequate quantity and quality of water for the future. The District's purpose is to provide for the regulation of the withdrawal of groundwater within the District to prevent subsidence that contributes to flooding, inundation or overflow of areas within the District, including rising waters resulting from storms or hurricanes.

Groundwater Database

GWDB

The Texas Water Development Board (TWDB) Groundwater Database (GWDB) contains information on selected water wells, springs, oil/gas tests (that were originally intended to be or were converted to water wells), water levels and water quality.

Harris Galveston Subsidence District Water Wells

WW HARRIS GAL

List of water wells in the Harris-Galveston Subsidence District (HGSD). The HGSD was created by the 64th Texas Legislature as an underground water conservation district in 1975 to provide regulation of groundwater withdrawal to control subsidence.

High Plains Water Wells

WW HIGH PLAINS

Inventory of water wells in the High Plains Underground Water Conservation District No. 1 (HPUWCD), which was created in 1951. As a political subdivision of Texas, HPUWCD is charged with protecting, preserving and conserving aquifers within the District's 16-county service area.

Oil and Gas Wells

OGW

Oil and Gas Well Data made available by the Railroad Commission of Texas.

Pipelines

PIPELINE

Locations of interstate and intrastate gas and liquids pipelines, made available by the Railroad Commission of Texas (RRC). Data is derived from RRC T-4 Permit applications ("Application for Permit to Operate a Pipeline in Texas"), which facilitate regulatory functions of the Pipeline Safety Section of the RRC. The digital data used to create the files was taken from the forms system within the RRC, from the General Land Office (GLO) county survey maps, and, United States Geological Survey (USGS) quadrangle maps.

Plotted Water Wells

WATER WELLS

A list of water wells in Texas that are plotted in Texas Commission on Environmental Quality (TCEQ) Water Well Report Viewer. The database provides the best representation of water well driller's reports available to the TCEQ as of the date of records collected. Note: records are plotted using the Texas Land Survey Grid System, identifying the 2.5 minute grid where wells are located but do not contain the offset necessary to pinpoint a specific location. Therefore, plotted locations are accurate to a resolution of 2.5 minute (2-3 miles).

Plugged Water Wells

PLUGGED WELLS

A list of plugged water wells from the Submitted Drillers Report (SDR) Database. This list is maintained by the Texas Water Development Board (TWDB).

Public Water Systems Wells and Surface Intakes

PWSW

Public Water Supply Water Well Sites and Public Water Supply Surface Water Intake Sites in the State of Texas made available by the Texas Commission on Environmental Quality (TCEQ). The locations for these layers were obtained by the Water Supply Division as recorded from various sources, and the data provider indicates that some locational errors have been identified. As resources allow, TCEQ intends to improve the accuracy of these locations to meet the standards set forth in the agency's Positional Data Policy.

Select Wells from SDR

SDRW WELLS

Locations of wells from the Submitted Drillers Report (SDR) Database with select proposed usage: Domestic, Fracking Supply, Industrial, Irrigation, Other, Public Supply, Rig Supply, Stock, Unknown. SDR is populated from the online Texas Well Report Submission and Retrieval System (TWRSSRS), a cooperative Texas Department of Licensing and Regulation (TDLR) and Texas Water Development Board (TWDB) application requiring registered water-well drillers to submit reports. Excludes SDR records with the following proposed usage: Closed-Loop Geothermal, De-watering, Environmental Soil Boring, Extraction, Injection, Monitor, Test Well.

Submitted Drillers Report Database

SDR WELLS

The Submitted Drillers Report (SDR) Database is populated from the online Texas Well Report Submission

Appendix

and Retrieval System (TWRSRS) which is a cooperative Texas Department of Licensing and Regulation (TDLR) and Texas Water Development Board (TWDB) application that registered water-well drillers use to submit their required reports.

Surveys

Survey boundaries made available by the Railroad Commission of Texas (RRC). A survey is a certified measured description of a piece of land. In Texas, original surveys were performed as part of the patenting process whereby land was transferred from the public domain. These "patent surveys", recorded at the Texas General Land Office (GLO), constitute an official land grid for the State and are the basis for subsequent land surveys. The digital data used to create surveys were taken from the forms system within the RRC, from the General Land Office (GLO) county survey maps, and United States Geological Survey (USGS) quadrangle maps.

SURVEY

Underground Injection Control

List of underground injection control (UIC) permits in the Texas Commission on Environmental Quality (TCEQ) Central Registry database. Includes Class I, Class III, Class IV, Class 5, and non permitted UICs; does not include injection wells regulated by the Railroad Commission of Texas.

UIC

Water Utility Database

The Water Utility Database is defined as a collection of data from Texas Water Districts, Public Drinking Water Systems and Water and Sewer Utilities who submit information to the TCEQ. This database is an integrated database designed and developed to replace over 160 stand alone legacy systems representing over 5 million records of the former Texas Water Commission and the Texas Department of Health.

WUD

Well Log Reports from Plotted Water Wells

Locations of TCEQ Water Wells as derived from well logs in the Texas Commission on Environmental Quality (TCEQ) Water Well Report Viewer, which includes unnumbered water wells and those plotted to 2.5 minute grid locations (2-3 miles). In this collection of Well Log Reports, locations have been manually verified.

TCEQ WELL LOGS

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Notice: IMPORTANT INFORMATION:

Service: Client has used a service offered by ERIS Information Inc. ("**ERIS**") to generate this report based upon certain search parameters set by Client, or in the case of ERIS's Vapor Encroachment Screening Tool and Checklist, certain search parameters set by ERIS and modified by Client (the "**Service**"). This report contains the results of a search conducted by ERIS of environmental records maintained by third parties. ERIS does not maintain, and has no responsibility for the accuracy or completeness of, such records.

Agreement: Client's use of the Service and any report generated thereby is subject to the Master Services Agreement previously entered into by Client and ERIS, or the terms and conditions accepted by Client in electronically submitting a request for the Service, (the "**Agreement**") and no provision of this Notice shall modify the Agreement. To the extent there is a conflict between any provision of this Notice and any provision of the Agreement, the latter shall control.

Liability Limitation: ERIS's liability for the Service and this report shall be limited to the amount paid by Client for this report and as otherwise set forth in the Agreement. Although in preparing this report ERIS has endeavored to present information that is accurate, ERIS will not have any liability for any errors, omissions or inaccuracies in such information, even if ERIS sets, or Client modifies, the parameters used to conduct the search.

Reliance on Report: This report (1) applies only to the address and the date specified on the cover page of this report and (2) is not a substitute for a Phase I Environmental Site Assessment, a Vapor Encroachment Assessment or any other similar assessment. It is solely intended to be used as a database search of current environmental records maintained by third parties, and Client should not rely on this report for any purpose for which it is not intended. Client may, in Client's discretion, modify search parameters within some of the tools of the Service that may affect the results for which ERIS is not responsible.

License for Use of Report: Client is licensed to use this report solely for its intended purpose as set forth in this Notice and the Agreement. No page of this report may be used by Client without including this report's cover page, this Notice and the project property identifier.

Client Liability: Use of the Service or this report in a manner contrary to this Notice or the Agreement will be a breach of contract and an infringement of ERIS's copyright and other intellectual property rights, for which ERIS will be entitled to damages and other remedies. In addition, upon any such breach or infringement, ERIS may terminate the Agreement, Client's account with ERIS, Client's license to use any reports previously generated for Client pursuant to the Service, and Client's future use of the Service.

Warranty Disclaimer: **EXCEPT AS EXPRESSLY SET FORTH IN THE AGREEMENT, ERIS MAKES NO WARRANTY OR REPRESENTATION REGARDING THE SERVICE, THIS REPORT OR THE RESULTS OF ANY SEARCH CONDUCTED BY CLIENT USING THE SERVICE.**

Ownership: Client may not use any of ERIS's trademarks or attribute any work product to ERIS other than as expressly set forth in this Notice or the Agreement. The Service and this reports are owned by ERIS (or its licensors) and protected by copyright and other intellectual property rights. No portion of this report may be, in whole or in part, modified, reproduced or transferred to a third party by Client, without the prior written consent of ERIS.

Executive Summary

This Report was produced through the ERIS Vapor Screening Tool. The ERIS Vapor Screening Tool and this report output are designed to help those in conducting a Vapor Encroachment Screening on a Property Involved in Real Estate Transactions under the ASTM Standard Designation E2600 – 15.

The following table lists the data sources searched and any hits in the Area of Concern (AOC) that have been included in the report. The search distances listed are based on search distances used in the Database Report and the search results are grouped based on the minimum default search distances for Chemicals of Concern (COCs) and Petroleum Hydrocarbon Chemicals of Concern (PHCOCs) as outlined in E2600-15. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment.

Owner/User Interviews and State/Local Records

ASTM E1527-21 Owner QUESTIONNAIRE

An "Owner Questionnaire" is completed by the owner, renter, or occupant to help gather information that may identify recognized environmental conditions at the property. This is a standard part of the Phase I Environmental Site Assessment "All Appropriate Inquiries" into a property's current and previous ownership and uses.

We ask that you answer the following questions below to the best of your knowledge. We understand that you may have little or no information regarding some of the questions. We encourage you to complete and return the questionnaire as soon as possible to help facilitate the efficient completion of this process. If you are unable or do not wish to fill out this questionnaire, we will reflect that in our report as is required. We appreciate your assistance!

Please fill in the blanks below, SAVE, and email back to us.

Completed by:

1. Do you have knowledge or experience with the property that would provide information about previous ownership or uses of the property that may be material to identifying the presence or likely presence of hazardous substances or petroleum products on or adjacent to the property under conditions that could result or could have resulted in a release to the ground, groundwater, or surface water?
no
2. Are you aware of any environmental liens placed on this property?
no
3. Are you aware of any litigation regarding hazardous materials or petroleum products on or adjacent to this property?
no
4. Are you aware of any administrative proceedings or notices from governmental agencies regarding possible violations of environmental laws or liability relating to hazardous substances or petroleum products on or adjacent to this property?
no
5. Are you aware of, and can you provide, any documents related to previous hazardous materials investigations of this property?
no
6. Do you know the past uses of this property (i.e., agriculture, industrial, factory, school, residences, etc.)?
no
7. Do you know of any current uses of this property or adjacent property that involve the treatment, storage, or disposal of hazardous substances or petroleum products?
no
8. Are you aware of any of the following on the property?
 - Above or belowground storage tanks, drums, or electrical or hydraulic equipment known or likely to contain PCBs, stains, corrosion (other than by water), noxious or strange odors, or stressed vegetation, pools of liquid, drains or sumps, pits, ponds, or lagoons?

no

USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the USER must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Please fill in the blanks below, SAVE, and email back to us.

Completed by: (insert name and title [if applicable] of person completing form here)

1. Are you aware of any environmental liens against the property filed or recorded under federal, tribal, state, or local law?

no

2. Are you aware of any activity and land use limitations (AULs), such as engineering controls, land-use restrictions, or institutional controls filed or recorded under federal, tribal, state, or local law?

no

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of any hazardous materials used by this type of business?

no

4. Does the purchase price being paid for this property reasonably reflect the property's fair market value? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

yes

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- a) Do you know the past uses of the property?
- b) Do you know of specific chemicals that are present or once present at the property?
- c) Do you know of spills or other chemical releases that have taken place at the property?
- d) Do you know of any environmental cleanups that have taken place at the property?

- a. Argulticual
- b. No
- c. no
- d. none

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

none

Completed by: Joe Humphrey, over the phone with Austin Sorscher

1. Do you have knowledge or experience with the property that would provide information about previous ownership or uses of the property that may be material to identifying the presence or likely presence of hazardous substances or petroleum products on or adjacent to the property under conditions that could result or could have resulted in a release to the ground, groundwater, or surface water?
yes
2. Are you aware of any environmental liens placed on this property?
no
3. Are you aware of any litigation regarding hazardous materials or petroleum products on or adjacent to this property?
There are none
4. Are you aware of any administrative proceedings or notices from governmental agencies regarding possible violations of environmental laws or liability relating to hazardous substances or petroleum products on or adjacent to this property?
There are none
5. Are you aware of, and can you provide, any documents related to previous hazardous materials investigations of this property?
no
6. Do you know the past uses of this property (i.e., agriculture, industrial, factory, school, residences, etc.)?
Farm in family since 1800s. When I was growing up in the 50s and 60s, we were growing cotton. At that time, my father was using DDT until it was banned. Raised grain after that. Wheat, non GMO. No large releases.
7. Do you know of any current uses of this property or adjacent property that involve the treatment, storage, or disposal of hazardous substances or petroleum products? No, rancher

that is leasing has used a sprayer for weed control and remedy for killing honey locus.

8. Are you aware of any of the following on the property?

- Above or belowground storage tanks, drums, or electrical or hydraulic equipment known or likely to contain PCBs, stains, corrosion (other than by water), noxious or strange odors, or stressed vegetation, pools of liquid, drains or sumps, pits, ponds, or lagoons?
- Four round stock ponds. Buried propane tank full of water close to the house. Natural gas pipeline.

Completed by: James Dowell, over the phone with Austin Sorscher

1. Do you have knowledge or experience with the property that would provide information about previous ownership or uses of the property that may be material to identifying the presence or likely presence of hazardous substances or petroleum products on or adjacent to the property under conditions that could result or could have resulted in a release to the ground, groundwater, or surface water?
Yes, within reason
2. Are you aware of any environmental liens placed on this property?
No
3. Are you aware of any litigation regarding hazardous materials or petroleum products on or adjacent to this property?
No
4. Are you aware of any administrative proceedings or notices from governmental agencies regarding possible violations of environmental laws or liability relating to hazardous substances or petroleum products on or adjacent to this property?
No
5. Are you aware of, and can you provide, any documents related to previous hazardous materials investigations of this property?
No
6. Do you know the past uses of this property (i.e., agriculture, industrial, factory, school, residences, etc.)?
In my lifetime, this has always been cattle grazing. Before that, much of this area was cotton.
7. Do you know of any current uses of this property or adjacent property that involve the treatment, storage, or disposal of hazardous substances or petroleum products?
No

8. Are you aware of any of the following on the property?
- Above or belowground storage tanks, drums, or electrical or hydraulic equipment known or likely to contain PCBs, stains, corrosion (other than by water), noxious or strange odors, or stressed vegetation, pools of liquid, drains or sumps, pits, ponds, or lagoons?
Natural ponds

Subject: Hazardous materials release records

Good afternoon,

I am writing to see if your department kept any records of hazardous materials or petroleum products release responses. I am specifically seeking information about any past hazardous materials or petroleum products releases on the following properties. I have provided the CAD IDs below. The properties are located north of Point on the southwest side of HWY 69. I have provided a map of the outline.

Property IDs

33375

4792

33373

33372

4527 (750 RS Private Road 5525, 75472)

4811

4817

506

Please let me know if you have any records of releases on these properties. Thank you.

Appendix G:
Qualifications

Austin Sorscher is a Staff Geologist with a B.A. in Geology from Carleton College (2019) and a M.S. in Geological Sciences from the University of Colorado Boulder (2022). His experience includes sedimentary petrography of carbonates and trace fossils, paleobotanical investigations, and computed tomography for non-destructive imaging of various types of fossils. Since his employment with Stantec he has conducted Phase I environmental assessments, TxDOT site assessments, and biological surveys.

Brian Cowan is a Professional Geologist | Hazardous Materials Program Coordinator with a B.S. in Geology from The State University of West Georgia (2006) and a M.S. in Geology from The University of Texas at Austin (2010). Mr. Cowan holds a Texas Professional Geoscientist License (#11180). Mr. Cowan has over 10 years of experience as an environmental scientist and geologist. His experience includes environmental assessments, Phase I Environmental Site Assessments, groundwater sampling and characterization, surface water sampling and characterization, NEPA documentation, Section 404 permitting, Section 7 permitting under the Endangered Species Act, Texas Commission on Environmental Quality and Texas Parks and Wildlife Department permitting, and project management. His experience includes public and private sector clients in the transportation, land development, defense, municipal, federal, and oil and gas sectors.
